

TRINAMIC MOTION CONTROL

WHAT IS

stallGuard™

AND HOW TO USE IT

MAR-2009

WEBINAR GG+TW

WEBINAR: Speaker

GUIDO GANDOLFO

Sales Director

- responsible for the worldwide sales
- degree in electrical engineering
- working with TRINAMIC since 2001

TOBIAS WENDLANDT

Field Application Engineer

- responsible for the technical sales support
- degree in electrical engineering
- working with TRINAMIC since 2008

WHAT IS: stallGuard™

PATENTED FEATURE FOR STEPPER MOTORS

stallGuard™

- sensorless **stall** detection
- sensorless load detection

STALL DETECTION: Applications

FOR OPTIMIZED AND SYMPLIFIED SYSTEMS

- **homing** without end- or reference switches
- **self-calibration**
- **distance measurement**

stallGuard™

APPLICATION: Homing

OF A LINEAR STEPPER MOTOR SYSTEM

Have a look at the YouTube video:

www.youtube.com/watch?v=7eCLV7pALig

TrinamicMC

APPLICATION: Homing

OF A ROTATIVE STEPPER MOTOR SYSTEM

APPLICATION: Self-Calibration

OF A LINEAR STEPPER MOTOR SYSTEM

Have a look at the YouTube video:

www.youtube.com/watch?v=G8i2x1M3A50

TrinamicMC

APPLICATION: Self-Calibration

OF A ROTATIVE STEPPER MOTOR SYSTEM

CD/DVD COPY ROBOT

pole

turning tower

APPLICATION: Measurement & Homing

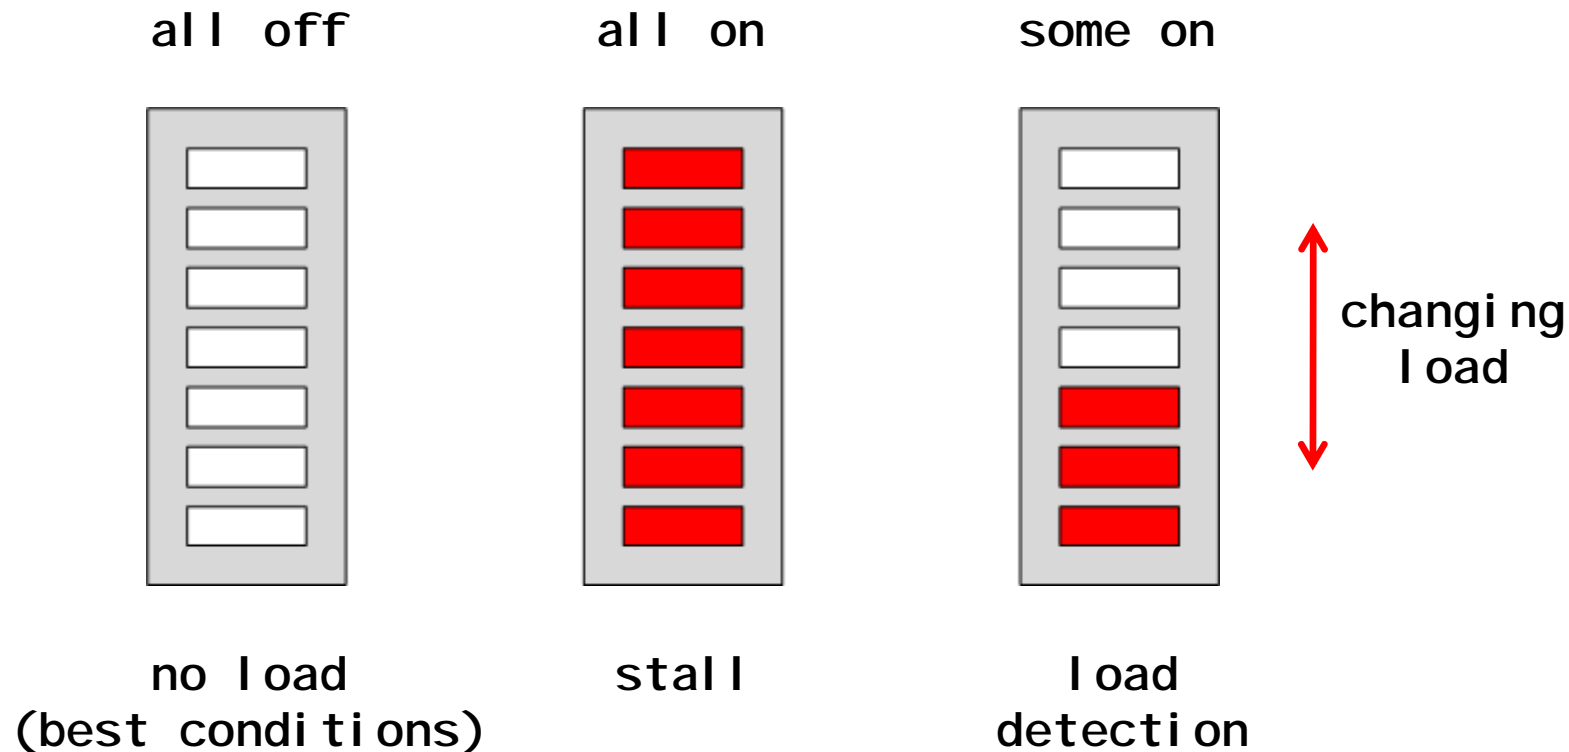

OF A LINEAR STEPPER MOTOR SYSTEM

$$\text{coin diameter} = \text{max. distance} - \text{measured distance}$$

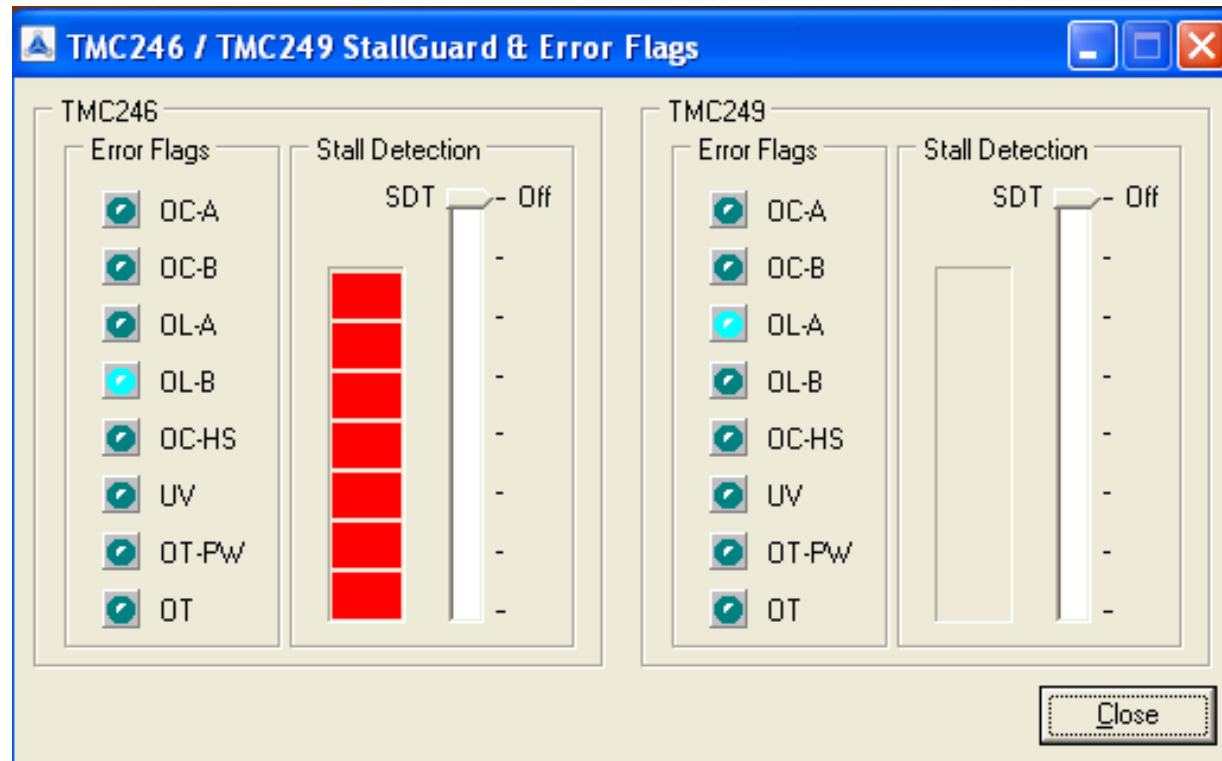

LOAD DETECTION: stallGuard™ Bargraph

3-BIT VALUE = 8 DIFFERENT LOAD LEVEL

ADJUSTING TOOL: Integrated Circuits

EVALBOARD SOFTWARE: TMC428A-EVAL

stallGuard™

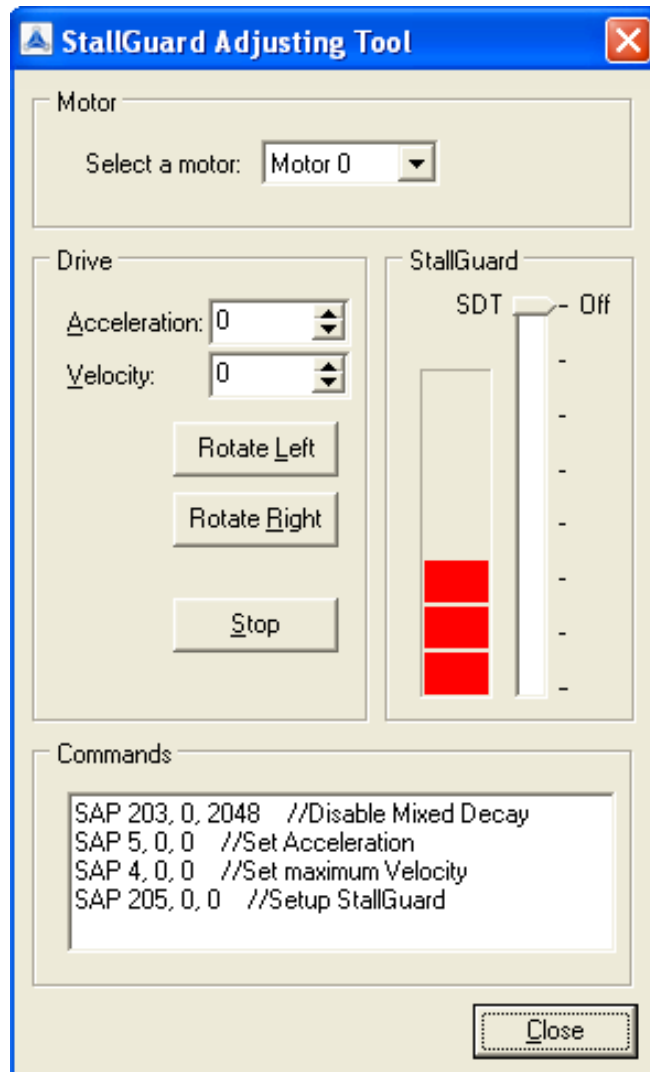

IC products with stallGuard™

TMC246 and TMC249

ADJUSTING TOOL: Modules & PANdrives

TMCL-IDE (INTEGRATED DEVELOPMENT ENVIRONMENT)

- most Trinamic modules (TMCM)
- most Trinamic PANdrives™

OPERATING CONDITIONS: Requirements

TO USE THE STALL AND LOAD DETECTION

- **minimum velocity** → stallGuard™ needs BACK EMF
- **constant velocity** → stallGuard™ level depends on velocity

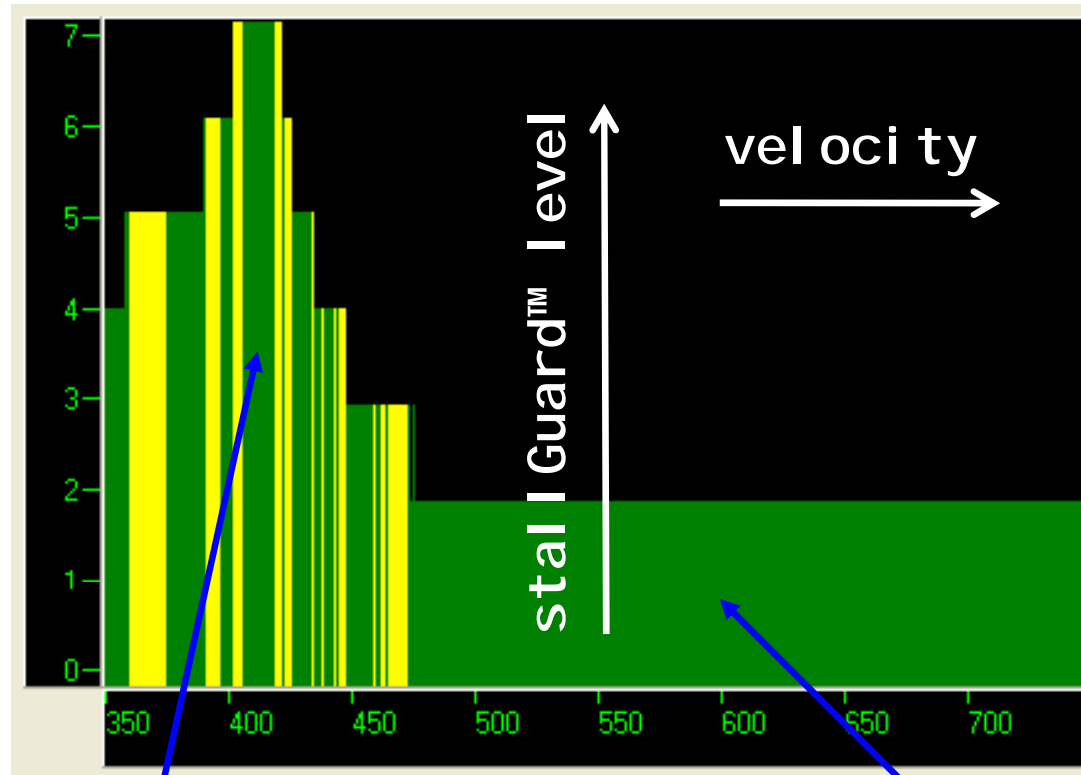

stallGuard™ is not an encoder replacement!

for evaluation and optimization of system conditions

→ **stallGuard™ profiler software tool**

PROFILER TOOL: Scanning the system

LOAD LEVEL ON DIFFERENT VELOCITIES

10 measurements
per velocity:

- green → 10 equal values
- yellow → 1 bit variation
- red → more than 1 bit variation

system resonances

(stepper motor system should not be operated in resonance condition)

best operating condition

MARKETS: stallGuard™

STEPPER MOTOR SOLUTIONS

The stallGuard™ feature gives advantage in many markets like:

- lab automation / biotec / medical equipment
- banking / card reader / POS
- semiconductor equipment
- high end office automation / printing
- robotics

blood analyzer

cash recycler / ATM

die bonder

skinning / strip equipment

CONCLUSION: why stallGuard™

BENEFITS

- reduce cost - save money
- increase precision
- raise reliability
- simplify solutions

be more competitive with **stallGuard™**

TRINAMIC

MOTION CONTROL
