

1. Description

In this demo, PWM0~PWM3 are used to output square wave with specified frequency.

2. Test

The PWM channels 0~3 (P2.0 ~ 3) will output square wave according to the setting in configuration wizard. So, user can specify PWM0~PWM3 output manner as wished using configuration wizard.

User can use a oscilloscopes to view if waveforms output by PWM0~PWM3 right or not.
